

On Staying Connected

Tips for virtual visitation during COVID-19

COVID-19 is a respiratory illness that spreads person-to-person and has affected people in many countries. For your safety, our patients' safety, and the safety of our hospital staff we are restricting visitation.

We understand during this time it is important to stay connected to your loved ones and remain aware of their status while hospitalized. **We encourage communication through the use of personal devices.**

Consider one of the following apps to connect virtually with your loved ones

You can download them in either the App Store (iPhone) or the Play Store (Android).

Both patient and visitor will need to download the same application.

Facebook
Messenger

Facetime
(iPhones only)

Google
Hangouts

Google
Duo

WhatsApp

Skype

Viber

Signal

Together we are working to meet the challenges that continue to evolve in our already-busy emergency rooms and intensive care units. We cannot adequately express how much we appreciate the unwavering dedication and professionalism of our clinical associates and providers in caring for our patients and our community, not only during this time, but every day of the year.

To our patients and their families, we appreciate your patience and flexibility during this time. It takes all of us to do our part to minimize the impact of COVID-19.
