

## MY MEDICATION INFORMATION

Did you know that approximately one-half of all prescriptions are taken incorrectly? As part of a state and nationwide movement, **Ministry Health Care** encourages you to list your medicines, vitamins and all other over-the-counter medicines and bring that list to each visit to your health care provider or hospital.

By listing and sharing your medication list you play a more active role in your health care and, not only do you help reduce medical errors, you also prevent harmful drug interactions. List it. Share it. Bring it. Use your own list or use the one on the back for a personal inventory of all medication that you use.

today. tomorrow. together.
