Implementation Strategy for the 2021 CHNA
Vanderburgh County, Indiana
The purpose of this Implementation Strategy is to describe how the hospital plans to address prioritized health needs from its current Community Health Needs Assessment (CHNA). The significant health needs that the hospital does not intend to address are identified and a rationale is provided. Special attention has been given to the needs of individuals and communities who are more vulnerable, unmet health needs or gaps in services, and input gathered from the community.

Ascension St. Vincent Evansville
2001 West 86th St
Evansville, IN  46260
317-338-2345
35-0869065

The 2021 Implementation Strategy was approved by the Ascension St. Vincent Evansville Board of Directors on September 30, 2022 (2021 tax year) and applies to the following three-year cycle: July 2022 to June 2025 (FY2023 - FY2025). This report, as well as the previous report, can be found at our public website.

We value the community's voice and welcome feedback on this report. Please visit our public website Community Health Needs Assessments | Ascension to submit your comments.

Introduction

As one of the leading non-profit and Catholic health systems in the United States, Ascension is committed to delivering compassionate, personalized care to all, with special attention to persons living in poverty and those most vulnerable.

Ascension St. Vincent Evansville

As a Ministry of the Catholic Church, Ascension St. Vincent Evansville is a non-profit hospital governed by a local board of trustees represented by community members, medical staff, and sister sponsorships. For many years, the hospital has been providing medical care for residents of Vanderburgh County, Indiana, and neighboring areas. In 1872, Sister Marie Voelker, DC and three other Daughters of Charity arrived in Evansville to start a healthcare facility located on the banks of the Ohio River in a former marine hospital which was used during the Civil War. In 1894, the second location was at the corner of First Avenue and Columbia Street. In 1956, the former St. Mary’s Medical Center relocated to Washington Street where it resides today. In 2017, the hospital changed its official name to St. Vincent Evansville for recognition purposes throughout the state of Indiana. Ascension St. Vincent Evansville hospital is a 508-bed acute care facility and offers the following services: bariatric services, cancer, cardiovascular services, diabetes care, maternity services, medical imaging, mental & behavioral health, orthopedics, pediatrics, rehabilitation services, respiratory care, senior services, surgery, wellness medicine, women’s health, and wound treatment. St. Vincent Evansville’s primary service area is Vanderburgh County which is in Southern Indiana. ASV Evansville’ primary service area is Vanderburgh County which is in Central Indiana.

For more information about Ascension St. Vincent Evansville, visit Ascension St. Vincent Evansville.

Overview of the Implementation Strategy

Purpose

This Implementation Strategy (IS) is the hospital’s response to the health needs prioritized from its current Community Health Needs Assessment (CHNA). It describes the actions the hospital will take to address prioritized needs, allocate resources, and mobilize hospital programs and community partners to work together. This approach aligns with Ascension St. Vincent Evansville’s commitment to offer programs designed to address the health needs of a community, with special attention to persons who are underserved and vulnerable.
IRS 501(r)(3) and Form 990, Schedule H Compliance

The CHNA and IS satisfy certain requirements of tax reporting, pursuant to provisions of the Patient Protection and Affordable Care Act of 2010, more commonly known as the Affordable Care Act (ACA). As part of the ACA, all not-for-profit hospitals are required to conduct a CHNA and adopt an implementation strategy every three years. Requirements for 501(c)(3) Hospitals Under the Affordable Care Act are described in Code Section 501(r)(3) and include making the CHNA report (current and previous) widely available to the public. In accordance with this requirement, electronic reports of both the CHNA and the current implementation strategy can be found at Community Health Needs Assessments | Ascension and paper versions can be requested at Ascension St. Vincent Evansville’s information desk located in the main lobby.

Process to Prioritize Needs

Included in Code Section 501(r)(3) is the requirement that hospitals must provide a description of the process and criteria used to determine the most significant health needs of the community identified through the CHNA, along with a description of the process and criteria used to determine the prioritized needs to be addressed by the hospital. Accordingly, Ascension St. Vincent Evansville used a phased prioritization approach to identify the needs within Vanderburgh County. The first step was to determine the broader set of identified needs. Through the CHNA, identified needs were then narrowed to a set of significant needs which were determined most crucial for community stakeholders to address. For more information on the methods and analysis used to determine community health needs, please visit 2021 CHNA - Ascension St. Vincent Evansville - Vanderburgh County

Following the completion of the CHNA, significant needs were further narrowed down to a set of prioritized needs that the hospital will address within the Implementation Strategy. To arrive at the prioritized needs, Ascension St. Vincent Evansville used the following process and criteria: hospital leaders reviewed the 2021 CHNA significant health needs and the data used to define each as significant, then voted on the top 3-5 needs they determined the hospital could address in the next three years.

The criteria used to prioritize the significant needs were:

- Alignment with the organization's mission, values, and strategic priorities.
- Alignment with existing service and area of expertise.
- Concern for low-income or vulnerable persons.
- Ability for organization to have an impact.
- Ability to leverage organizational assets.
Needs That Will Be Addressed

Following the completion of the current CHNA, Ascension St. Vincent Evansville has selected the prioritized needs outlined below for its FY2023 - FY2025 Implementation Strategy. Ascension has defined “prioritized needs” as the significant needs which have been prioritized by the hospital to address through the three-year CHNA cycle:

- **Access to Care** – This need was selected because access to care indicators such as adults reporting fair or poor health, low birthweight babies, per capita supply of healthcare providers, preventable hospital stays, and/or core preventive services compared unfavorably to peer counties or U.S. averages and because community meeting participants identified access to care (including preventive services) as a priority.

- **Mental Health** – This need was selected because mental health indicators such as number of mentally unhealthy days, number of mental health providers per population, depression rate and/or suicide rate compared unfavorably to peer counties or U.S. averages and because community meeting participants identified mental health and adverse childhood experiences (ACEs) as a priority.

- **Poverty, Maternal, and Infant Health** – This need was selected because community members identified it as a significant need and the following indicators compared unfavorably to state and national benchmarks:
  - Poverty rates in Vanderburgh County were above U.S. averages for all races and ethnicities combined and individually (Black, Hispanic, and White populations).
  - The Community Need Index (CNI) weighted average for Vanderburgh County was 3.3. The CNI is calculated for every ZIP Code in the United States. The median score for the U.S. is 3.0, and ZIP Codes are assigned to five categories ranging from “Lowest Need” (scores of 1.0 to 1.7) to “Highest Need” (scores ranging from 4.2 to 5.0). At 3.3 (weighted by the population of each ZIP Code), the weighted average CNI score for Vanderburgh County is above the U.S. median and indicates that a sizable portion of the population lives in “highest need ZIP Codes.
  - Maternal and child health indicators such as infant mortality, preterm births, low birthweight infants, mothers smoking during pregnancy, and/or mothers on Medicaid were unfavorable compared to state and national benchmarks.

Ascension St. Vincent Evansville understands the importance of all the health needs of the community and is committed to playing an active role in improving the health of the people in the communities it serves. For the purposes of this Implementation Strategy, Ascension St. Vincent Evansville has chosen to focus its efforts on the priorities listed above.
Needs That Will Not Be Addressed

Based on the prioritization criteria, the health needs identified through the CHNA that Ascension St. Vincent Evansville does not plan to address at this time include:

- **COVID-19 Pandemic** - The hospital, together with Ascension Medical Group (AMG), a physician-led provider organization, continues to provide treatment for community members diagnosed with COVID-19, as it has done since the beginning of the pandemic. As federal, state, and local authorities are providing leadership for prevention and surveillance activities, the hospital will not directly address the COVID-19 pandemic in the current Implementation Strategy.

- **Food Security** - The hospital works to improve food security of community members through a variety of means, such as continuation of partnerships with schools to support weekend feeding programs or school nutrition programs, financial donations to charitable organizations, and/or food drives. Moreover, the hospital, together with AMG, screens patients for food insecurity and provides referrals to community resources and/or hospital-based local resources. Additionally, the hospital remains committed to partnering with community groups to address this identified health need and will continue to seek opportunities to do so. As federal, state, and local authorities, as well as community-based organizations, are working to improve food security, the hospital will not directly address this need in the current Implementation Strategy.

- **Obesity, Physical Inactivity, and Associated Chronic Disease** - The hospital, together with AMG, provides education on various health topics related to obesity, physical inactivity, and associated chronic disease through health fairs and screenings, health education, wellness programs, lectures, school health education programs, and/or community support groups. Additionally, the hospital remains committed to partnering with community groups to address these identified health needs and will continue to seek opportunities to do so. As federal, state, and local authorities, as well as community-based organizations, are working to reduce this need, the hospital will not directly address this need in their current Implementation Strategy.

- **Senior Services** - The hospital, together with AMG, works collaboratively with the Ascension St. Vincent - Center for Healthy Aging to support older adults as they cope with complex health problems that can be associated with aging. Additionally, the hospital remains committed to partnering with community groups to address these identified health needs and will continue to seek opportunities to do so. As federal, state, and local authorities, as well as community-based organizations, are working to address needs of seniors, the hospital will not directly address this need in the current Implementation Strategy.

- **Substance Use Disorders and Overdoses** - The hospital, together with AMG, does provide diagnoses, treatment, and counseling for community members with substance use disorders and overdoses, most notably through emergency services. Additionally, the hospital remains committed to partnering with community groups to address this identified health need and will continue to seek opportunities to do so. As federal, state, and local authorities, as well as
community-based organizations, have focused efforts to reduce substance use disorders and overdoses, the hospital will not directly address this need in the current Implementation Strategy.

While these needs are not the focus of this Implementation Strategy, Ascension St. Vincent Evansville may consider investing resources in these areas as appropriate, depending on opportunities to leverage organizational assets in partnership with local communities and organizations. Also, this report does not encompass a complete inventory of everything Ascension St. Vincent Evansville does to support health within the community.

To find a list of resources for each need not being addressed, please refer to the Ascension St. Vincent Evansville 2021 CHNA.

**Acute Community Concern Acknowledgement**

A CHNA and Implementation Strategy (IS) offer a construct for identifying and addressing needs within the community(s) it serves. However, unforeseen events or situations, which may be severe and sudden, may affect a community. At Ascension, this is referred to as an acute community concern. This could describe anything from a health crisis (e.g., COVID-19), water poisoning, environmental events (e.g., hurricane, flood) or other event that suddenly impacts a community. In which case, if adjustments to an IS are necessary, the hospital will develop documentation, in the form of a SBAR (Situation-Background-Assessment-Response) evaluation summary, to notify key internal and external stakeholders of those possible adjustments.

**Written Comments**

This Implementation Strategy is available to the public and is open for public comment. Questions or comments about this implementation strategy can be submitted via the website: Community Health Needs Assessments | Ascension.

**Approval and Adoption by Ascension St. Vincent Evansville Board of Directors**

To ensure the Ascension St. Vincent Evansville’s efforts meet the needs of the community and have a lasting and meaningful impact, the 2021 Implementation Strategy was presented and adopted by the Ascension St. Vincent Evansville Board of Directors on September 30, 2022. Although an authorized body of the hospital must adopt the IS to be compliant with the provisions in the Affordable Care Act, adoption of the IS also demonstrates that the board is aware of the IS, endorses the priorities identified, and supports the action plans that have been developed to address prioritized needs.
Action Plans

The IS below is based on prioritized needs from the hospital's most recent CHNA. These strategies and action plans represent where the hospital will focus its community efforts over the next three years. While these remain a priority, the hospital will continue to offer additional programs and services to meet the needs of the community, with special attention to those who are poor and vulnerable.

**GOAL:**
Increase access to comprehensive, high-quality health care services.

### Output and/or Outcome Objective #1
- **Baseline:** No standardized PMAD screening and referral program in place.
- **Target:** Standardized PMAD screening and referral program in place amongst PCC and select AMG OB practices.
- **Data Source:** PMAD Pilot Program Summary Report, PCC Social Worker

### Output and/or Outcome Objective #2
- **Baseline:** Percent of women receiving postpartum care within 56 days of delivery, amongst PCC and select AMG OB practices, established in FY2023.
- **Target:** Increase the percentage of women receiving postpartum care within 56 days of delivery by 5.0%, amongst PCC and select AMG OB practices, by the end of FY2025.
- **Data Source and Data Owner:** Ascension Quality Scorecard, Quality and Patient Safety Director

### GOAL:
**Improve the health of the mother-baby dyad before, during, and after pregnancy and prevent maternal and infant deaths.**

### Hospital Name
Ascension St. Vincent Evansville

### Prioritized Health Need #3
Poverty, Maternal, and Infant Health

### Strategy #3
Reduce the proportion of babies born with low birth weight.

### Strategy Source
The Community Health Access Project
[https://chap-ohio.com/](https://chap-ohio.com/)

### Objective
By June 30, 2025, Ascension St. Vincent Evansville will increase the number of babies born weighing more than 5 lbs. 8 oz. by 5.0%, each year, amongst the individuals who complete a Pregnancy Pathway, from baseline established in FY2023.
### Target Population
- Target Population: Pregnant women, infants, and families
- Medically Underserved Population: People who are uninsured or underinsured, people who are underserved by mental and medical health resources, and Black women.

### Collaborators
- Health Access Department

### Resources
- Community Health Workers (CHW) from Health Access Department

**Evaluation**

Ascension St. Vincent Evansville will develop a comprehensive measurement and evaluation process for the Implementation Strategy. The Ministry will monitor and evaluate the action plans outlined in this plan for the purpose of reporting and documenting the impact these action plans have on the community. Ascension St. Vincent Evansville uses a tracking system to capture community benefit activities and implementation. To ensure accountability, data will be aggregated into an annual Community Benefit report that will be made available to the community.
