

Ascension St. Vincent Seton Specialty

**Implementation Strategy for the 2021 CHNA
Marion County, Indiana**

Ascension

The purpose of this Implementation Strategy (IS) is to describe how the hospital plans to address prioritized health needs from its current Community Health Needs Assessment (CHNA). The significant health needs that the hospital does not intend to address are identified and a rationale is provided. Special attention has been given to the needs of individuals and communities who are more vulnerable, unmet health needs or gaps in services, and input gathered from the community.

Ascension St. Vincent Seton Specialty
8050 Township Line Rd
Indianapolis, IN 46260
317-415-8500
35-1712001

The 2021 Implementation Strategy was approved by the Ascension St. Vincent Seton Specialty Board of Directors on September 15, 2022 (2021 tax year) and applies to the following three-year cycle: July 2022 to June 2025 (FY2023 - FY2025). This report, as well as the previous report, can be found at our public website.

We value the community's voice and welcome feedback on this report. Please visit our public website (<https://healthcare.ascension.org/chna>) to submit your comments.

Introduction

As one of the leading non-profit and Catholic health systems in the United States, Ascension is committed to delivering compassionate, personalized care to all, with special attention to persons living in poverty and those most vulnerable.

Ascension St. Vincent Seton Specialty

As a Ministry of the Catholic Church, Ascension St. Vincent Seton Specialty is a non-profit hospital governed by a local board of trustees represented by community members, medical staff, and sister sponsorships. For many years, the hospital has been providing medical care for residents of Marion County, Indiana, and neighboring areas. In 1996, St. Vincent Seton Specialty, formerly St. Elizabeth Ann Seton Long Term Acute Care Hospital, was created and grew to three locations with two of those locations within St. Vincent Hospitals. The third location was within St. Elizabeth's Hospital in Lafayette. In 2006, a freestanding two-story facility was built in Indianapolis. Seton is a 74-bed long-term, acute care hospital dedicated to improving quality of life for patients who experience multiple complications requiring an extended hospital stay of 25 days or more. Ascension St. Vincent Seton's primary service area is Marion County which is in Central Indiana.

Overview of the Implementation Strategy

Purpose

This Implementation Strategy (IS) is the hospital's response to the health needs prioritized from its current Community Health Needs Assessment (CHNA). It describes the actions the hospital will take to address prioritized needs, allocate resources, and mobilize hospital programs and community partners to work together. This approach aligns with Ascension St. Vincent Seton Specialty's commitment to offer programs designed to address the health needs of a community, with special attention to persons who are underserved and vulnerable.

IRS 501(r)(3) and Form 990, Schedule H Compliance

The CHNA and IS satisfy certain requirements of tax reporting, pursuant to provisions of the Patient Protection and Affordable Care Act of 2010, more commonly known as the Affordable Care Act (ACA). As part of the ACA, all not-for-profit hospitals are required to conduct a CHNA and adopt an Implementation Strategy every three years. Requirements for 501(c)(3) Hospitals Under the Affordable Care Act are described in Code Section 501(r)(3) and include making the CHNA report (current and previous) widely available to the public. In accordance with this requirement, electronic reports of both the CHNA and the current Implementation Strategy can be found at [Community Health Needs](#)

[Assessments | Ascension](#) and paper versions can be requested at Ascension St. Vincent Seton Specialty's information desk located in the main lobby.

Process to Prioritize Needs

Included in Code Section 501(r)(3) is the requirement that hospitals must provide a description of the process and criteria used to determine the most significant health needs of the community identified through the CHNA, along with a description of the process and criteria used to determine the prioritized needs to be addressed by the hospital. Accordingly, Ascension St. Vincent Seton Specialty used a phased prioritization approach to identify the needs within Marion County. The first step was to determine the broader set of identified needs. Through the CHNA, identified needs were then narrowed to a set of significant needs which were determined most crucial for community stakeholders to address. For more information on the methods and analysis used to determine community health needs, please visit [2021 CHNA - Ascension St. Vincent Seton Specialty - Marion County](#)

Following the completion of the CHNA, significant needs were further narrowed down to a set of prioritized needs that the hospital will address within the Implementation Strategy. To arrive at the prioritized needs, Ascension St. Vincent Seton Specialty used the following process and criteria: hospital leaders reviewed the 2021 CHNA significant health needs and the data used to define each as significant, then voted on the top 3-5 needs they determined the hospital could address in the next three years.

The criteria used to prioritize the significant needs were:

- Alignment with the organization's mission, values, and strategic priorities.
- Alignment with existing service and area of expertise.
- Concern for low-income or vulnerable persons.
- Ability for organization to have an impact.
- Ability to leverage organizational assets.

Needs That Will Be Addressed

Following the completion of the current CHNA, Ascension St. Vincent Seton Specialty has selected the prioritized needs outlined below for its FY2023 - FY2025 Implementation Strategy. Ascension has defined "prioritized needs" as the significant needs which have been prioritized by the hospital to address through the three-year CHNA cycle:

- **Access to Care** – This need was selected because access to care indicators such as adults reporting fair or poor health, low birthweight babies, per capita supply of healthcare providers, preventable hospital stays, and/or core preventive services compared unfavorably to peer counties or U.S. averages and because community meeting participants identified access to care (including preventive services) as a priority.

- **Mental Health** – This need was selected because mental health indicators such as number of mentally unhealthy days, number of mental health providers per population, depression rate and/or suicide rate compared unfavorably to peer counties or U.S. averages and because community meeting participants identified mental health and adverse childhood experiences (ACEs) as a priority.

Ascension St. Vincent Seton Specialty understands the importance of all the health needs of the community and is committed to playing an active role in improving the health of the people in the communities it serves. For the purposes of this Implementation Strategy, Ascension St. Vincent Seton Specialty has chosen to focus its efforts on the priorities listed above.

Needs That Will Not Be Addressed

Based on the prioritization criteria, the health needs identified through the CHNA that Ascension St. Vincent Seton Specialty does not plan to address in this Implementation Strategy include:

- **COVID-19 Pandemic** - The hospital, together with Ascension Medical Group (AMG), a physician-led provider organization, continues to provide treatment for community members diagnosed with COVID-19, as it has done since the beginning of the pandemic. As federal, state, and local authorities are providing leadership for prevention and surveillance activities, the hospital will not directly address the COVID-19 pandemic in the current Implementation Strategy.
- **Food Security** - The hospital works to improve food security of community members through a variety of means, such as continuation of partnerships with schools to support weekend feeding programs or school nutrition programs, financial donations to charitable organizations, and/or food drives. Moreover, the hospital, together with AMG, screens patients for food insecurity and provides referrals to community resources and/or hospital-based local resources. Additionally, the hospital remains committed to partnering with community groups to address this identified health need and will continue to seek opportunities to do so. As federal, state, and local authorities, as well as community-based organizations, are working to improve food security, the hospital will not directly address this need in the current Implementation Strategy.
- **Obesity, Physical Inactivity, and Associated Chronic Disease** – The hospital, together with AMG, provides education on various health topics related to obesity, physical inactivity, and associated chronic disease through health fairs and screenings, health education, wellness programs, lectures, school health education programs, and/or community support groups. Additionally, the hospital remains committed to partnering with community groups to address these identified health needs and will continue to seek opportunities to do so. As federal, state, and local authorities, as well as community-based organizations, are working to reduce this need, the hospital will not directly address this need in their current Implementation Strategy.
- **Smoking and Tobacco Use** - The hospital, together with AMG, screens patients for tobacco use and promotes the use of the evidence-based state tobacco cessation quitline (1-800-Quit-Now). Additionally, the hospital remains committed to partnering with community groups to address

this identified health issue and will continue to seek opportunities to do so. As federal, state, and local authorities, as well as community-based organizations, are working to reduce smoking and tobacco use, the hospital will not directly address this need in the current Implementation Strategy.

- **Violence and Crime** - The hospital, together with AMG, screens patients to identify safety concerns as well as for social determinants of health factors related to violence and crime. Moreover, supporting services and referrals are provided by Community Health Workers in the Ascension St. Vincent Health Access Department, to respond to violence and crime encountered by patients. Additionally, the hospital remains committed to partnering with community groups to address these identified health needs and will continue to seek opportunities to do so. As federal, state, and local authorities, as well as community-based organizations, are working to reduce violence and crime, the hospital will not directly address this need in the current Implementation Strategy.
- **Social Determinants of Health, including poverty, affordable housing, food insecurity, and transportation** - The hospital, together with AMG, screens patients for needs related to social determinants of health. Moreover, supporting services and referrals are provided by Community Health Workers in the Ascension St. Vincent Health Access Department, to meet needs, such as transportation and housing. Additionally, the hospital remains committed to partnering with community groups to address needs related social determinants of health and will continue to seek opportunities to do so. As federal, state, and local authorities, as well as community-based organizations, are working to reduce this need, the hospital will not directly address this need in the current Implementation Strategy.

While these needs are not the focus of this Implementation Strategy, Ascension St. Vincent Seton Specialty may consider investing resources in these areas as appropriate, depending on opportunities to leverage organizational assets in partnership with local communities and organizations. Also, this report does not encompass a complete inventory of everything Ascension St. Vincent Seton Specialty does to support health within the community.

To find a list of resources for each need not being addressed, please refer to the: [Ascension St. Vincent Seton Specialty 2021 CHNA](#).

Acute Community Concern Acknowledgement

A CHNA and Implementation Strategy offer a construct for identifying and addressing needs within the community(s) it serves. However, unforeseen events or situations, which may be severe and sudden, may affect a community. At Ascension, this is referred to as an acute community concern. This could describe anything from a health crisis (e.g., COVID-19), water poisoning, environmental events (e.g., hurricane, flood) or other event that suddenly impacts a community. In which case, if adjustments to an IS are necessary, the hospital will develop documentation, in the form of a [SBAR](#)

(Situation-Background-Assessment-Response) evaluation [summary](#), to notify key internal and external stakeholders of those possible adjustments.

Written Comments

This Implementation Strategy is available to the public and is open for public comment. Questions or comments about this Implementation Strategy can be submitted via the website:

Approval and Adoption by Ascension St. Vincent Seton Specialty Board of Directors

To ensure the Ascension St. Vincent Seton Specialty's efforts meet the needs of the community and have a lasting and meaningful impact, the 2021 Implementation Strategy was presented and adopted by the Ascension St. Vincent Seton Specialty Board of Directors on September 15, 2022. Although an authorized body of the hospital must adopt the IS to be compliant with the provisions in the Affordable Care Act, adoption of the IS also demonstrates that the board is aware of the IS, endorses the priorities identified, and supports the action plans that have been developed to address prioritized needs.

Action Plans

The IS below is based on prioritized needs from the hospital’s most recent CHNA. These strategies and action plans represent where the hospital will focus its community efforts over the next three years. While these remain a priority, the hospital will continue to offer additional programs and services to meet the needs of the community, with special attention to those who are poor and vulnerable.

GOAL:	
Increase access to comprehensive, high-quality health care services.	
Hospital Name Ascension St. Vincent Seton Specialty	
Prioritized Health Need #1 Access to Care	
Strategy #1 Increase the proportion of people with a usual primary care provider. (AHS-07)	
Strategy Source Healthy People 2030, Healthcare Access and Quality	
Objective By June 30, 2025, Ascension St. Vincent Seton Specialty will increase the number of patients established with a medical home by 2.0% each year, amongst individuals who complete a Medical Home Pathway, from baseline established in FY2023.	
Target Population <ul style="list-style-type: none"> • People with lower incomes, older adults, people with undocumented status, people experiencing homelessness, people with disabilities, people at risk for chronic conditions or with pre-existing medical conditions, Black or African American persons, Hispanic or Latino persons or other racial and ethnic minority groups who experience discrimination, and the LBGTQ community. • Medically Underserved Population: People who are uninsured or underinsured and people who are underserved by mental and medical health resources.

ANTICIPATED IMPACT	
The anticipated impact of these actions is to improve mental health by supporting and engaging with coalitions and implementing partners addressing mental health concerns.	

Evaluation

Ascension St. Vincent Seton Specialty will develop a comprehensive measurement and evaluation process for the Implementation Strategy. The Ministry will monitor and evaluate the action plans outlined in this plan for the purpose of reporting and documenting the impact these action plans have on the community. Ascension St. Vincent Seton Specialty uses a tracking system to capture community benefit activities and implementation. To ensure accountability, data will be aggregated into an annual Community Benefit report that will be made available to the community.
