2021 Community Health Needs Assessment
Livingston, Macomb, Oakland, St. Clair, and Wayne (City of Detroit) Counties, Michigan

Conducted: July 1, 2021 - June 30, 2022
Tax Year: 2021
The goal of this report is to offer a meaningful understanding of the most significant health needs across southeast Michigan, as well as to inform planning efforts to address those needs. Special attention has been given to the needs of individuals and communities who are more vulnerable, unmet health needs or gaps in services, and input gathered from the community. Findings from this report can be used to identify, develop, and focus hospital, health system, and community initiatives and programming to better serve the health and wellness needs of the community.

The 2021 community health needs assessment report was approved by the Ascension Southeast Michigan Board of Trustees on June 20, 2022 (2021 tax year), and applies to the following three-year cycle: July 1, 2022 to June 30, 2025. This report, as well as the previous report, can be found at our public websites.

We value the community's voice and welcome feedback on this report. Please visit our public website (https://healthcare.ascension.org/chna) to submit your comments.

Executive Statements

The 2021 community health needs assessment (CHNA) represents a true collaborative effort in order to gain a meaningful understanding of the most pressing health needs across southeast Michigan. Ascension Southeast Michigan hospitals are exceedingly thankful to the many community organizations and individuals who shared their views, knowledge, expertise, and skills with us. A complete description of community partner contributions is included in this report. We look forward to our continued collaborative work to make this a better, healthier place for all people.

We would also like to thank you for reading this report, and your interest and commitment to improving the health of southeast Michigan.

Kevin Grady, MD
Regional President & Chief Executive Officer
Ascension St. John Hospital, Ascension Macomb-Oakland Hospital (Madison Heights and Warren Campuses), Ascension River District Hospital

Gary Druskovich, MD, MBA
Regional President & Chief Executive Officer
Ascension Providence Hospital (Novi and Southfield Campuses), Ascension Providence Rochester Hospital, Ascension Brighton Center for Recovery

Cynthia Taueg DHA, MPH, BSN
Vice President of Community Health
Ascension Southeast Michigan

“Health and well-being does not happen by chance. Nor is it the sole responsibility of healthcare institutions. To be achieved each individual and organization must do its part.”

“Our mission calls us to approach health holistically, paying attention to the physical, mental, social and spiritual aspects of those we serve. We can only do this effectively when we partner and collaborate with others who share our health mission.”

“While important, improving the health and quality of life of those we serve cannot be achieved inside the walls of a hospital alone. The role of community based organizations to address non medical needs and influencers of health is critical.”
Executive Summary

The goal of the 2021 community health needs assessment (CHNA) report is to offer a meaningful understanding of the most significant health needs across southeast Michigan. Findings from this report can be used to identify, develop, and focus hospital, health system, and community initiatives and programming to better serve the health and wellness needs of the community.

Purpose of the CHNA

As part of the Patient Protection and Affordable Care Act of 2010, all not-for-profit hospitals are required to conduct a community health needs assessment (CHNA) and adopt an implementation strategy every three years. The purpose of the CHNA is to understand the health needs and priorities of those who live and/or work in the communities served by the hospital, with the goal of addressing those needs through the development of an implementation strategy plan.

For the purposes of the 2021 CHNA, this report applies to the five Ascension hospitals located within southeast Michigan:

- Ascension St. John Hospital
- Ascension Macomb-Oakland Hospital: Warren campus and Madison Heights campus
- Ascension Providence Hospital: Southfield campus and Novi campus
- Ascension River District Hospital
- Ascension Brighton Center for Recovery

Community Served

Although Ascension Southeast Michigan (SEM) hospitals serve southeast Michigan and the surrounding areas, Ascension SEM hospitals have defined the community served as the counties where the five (5) hospitals reside: Livingston, Macomb, Oakland, St. Clair, and Wayne (City of Detroit). The five counties were selected as Ascension SEM hospital’s community served because it is our primary service area and our partners’ primary service area. Also, community health data is readily available at the county level.

Data Analysis Methodology

The 2021 CHNA was conducted from July 2021 to April 2022, and utilized the Hanlon Method which incorporated data from both primary and secondary sources. Primary data sources included information provided by groups/individuals, e.g., community residents, health care consumers, health care professionals, community stakeholders, and multi-sector representatives. Special attention was given to the needs of individuals and communities who are more vulnerable, and to unmet health needs or gaps in services. The community input consisted of 751 responses to the general community survey and 121 responses to the youth community survey. There were two key stakeholder focus groups conducted to get insight on the needs of the community from the organizations that serve the communities. Secondary data was compiled and reviewed to understand the health status of the
community. Measures reviewed included chronic disease, social and economic factors, and healthcare access and utilization trends in the community and were gathered from reputable and reliable sources.

Community Needs

Ascension SEM hospitals, with facilitation of the Ascension Southeast Michigan Community Health Department and Ascension Michigan Community Benefit Center of Expertise and contracted assistance from Southeastern Michigan Health Association (SEMHA), analyzed secondary data of over 50 indicators and gathered community input through community surveys and key stakeholders focus groups to identify the needs in the five counties. In collaboration with community partners, Ascension SEM hospitals used a phased prioritization approach to determine the most crucial needs for community stakeholders to address. The 2021 significant needs are as follows:

- Chronic Disease, including Diabetes and Cancer
- Diet and Exercise, including Obesity
- Mental and Behavioral Health
- Access to Care

Ascension SEM hospitals understand the importance of all the needs of the community and are committed to playing an active role in improving the health of the people served. For the purposes of the 2021 CHNA and subsequent three-year CHNA implementation strategy, Ascension SEM hospitals will prioritize its efforts on the needs below:

- Mental Health (includes stress, anxiety and depression)
- Healthy Behaviors and Chronic Disease Issues
- Access to Care (with emphasis on maternal and infant health)

A resolution for the three Prioritized Needs were presented, and approved, to the Ascension Southeast Michigan Board of Trustees board on June 20, 2022. It is now the task to develop an implementation strategy, or action plan, for each Prioritized Needs taking into consideration the populations to be served, access to resources that will allow our ability to serve them, potential for partnerships and collaboration for collective impact, and measurability of the impact or outcomes of the implementation strategy.
About Ascension

As one of the leading non-profit and Catholic health systems in the United States, Ascension is committed to delivering compassionate, personalized care to all, with special attention to persons living in poverty and those most vulnerable.

Ascension

Ascension is a faith-based healthcare organization dedicated to transformation through innovation across the continuum of care. The national health system operates more than 2,600 sites of care – including 146 hospitals and more than 40 senior living facilities – in 19 states and the District of Columbia, while providing a variety of services including clinical and network services, venture capital investing, investment management, biomedical engineering, facilities management, risk management, and contracting through Ascension's own group purchasing organization.

Ascension's Mission provides a strong framework and guidance for the work done to meet the needs of communities across the U.S. It is foundational to transform healthcare and express priorities when providing care and services, particularly to those most in need.

Mission: Rooted in the loving ministry of Jesus as healer, we commit ourselves to serving all persons with special attention to those who are poor and vulnerable. Our Catholic health ministry is dedicated to spiritually-centered, holistic care which sustains and improves the health of individuals and communities. We are advocates for a compassionate and just society through our actions and our words.

For more information about Ascension, visit https://www.ascension.org/.

Ascension Southeast Michigan Hospitals

As a Ministry of the Catholic Church, Ascension SEM hospitals are non-profit hospitals governed by a local board of trustees represented by residents, medical staff, and sister sponsorships, and have been providing medical care to southeast Michigan. Ascension SEM hospitals operates five hospitals with seven campuses, 10 ambulatory campuses, and employs more than 880 primary and specialty care physicians.

Ascension St. John Hospital

Ascension St. John Hospital is a full-service 714-bed hospital with 24/7 emergency care, and a Level I Trauma Center. We deliver advanced surgical care for serious and life-threatening injuries and illnesses. The care teams listen to quickly understand your health needs and deliver care that’s right for you. Ascension St. John is a destination for specialty care - including heart, cancer, stroke care, orthopedics and women's health. The OB-GYN maternity care teams at our Birthing Center deliver a personalized birthing experience and advanced neonatal care for sick
babies. Minimally invasive procedures using robotic-assisted technology, imaging and lab tests, a dedicated inpatient rehabilitation center, all on one campus.

https://healthcare.ascension.org/locations/michigan/midet/detroit-ascension-st-john-hospital

Ascension Macomb-Oakland Hospital

Ascension Macomb-Oakland Hospital - Warren campus is a full-service hospital with 24/7 emergency care, and a Level III Trauma Center. We deliver advanced surgical care for serious and life-threatening injuries and illnesses. Our care teams listen to quickly understand your health needs and deliver care that's right for you. Ascension Macomb-Oakland Hospital - Warren is a destination for specialty care - including advanced heart care, stroke and cancer care, advanced orthopedics and neurosciences, women's health, behavioral health and senior specialty care. The OB-GYN maternity care teams deliver a personalized birthing experience. Minimally invasive surgical procedures using robotic-assisted technology, imaging and lab tests, and a dedicated inpatient rehabilitation center, all on one campus.

Ascension Macomb-Oakland Hospital - Madison Heights campus is a full-service hospital with a Level III Trauma Center with 24/7 emergency care and surgical specialists. Our doctors and care teams deliver personalized care for serious and life-threatening injuries and illnesses. We listen to quickly understand your health needs to deliver care that is right for you. We provide many specialty care services including bariatric weight loss, sleep medicine, and more. At Ascension Macomb-Oakland, we deliver a wide range of outpatient services, including diagnostic imaging, lab tests, pharmacy, respiratory therapy, and rehabilitation therapy services all on one campus.

Combined beds between Madison Heights and Warren campuses are 535.

Ascension Providence Hospital

Ascension Providence Hospital - Southfield campus is a full-service hospital with 24/7 emergency care, a Level II Trauma Center, and a Primary Stroke Center. We deliver advanced surgical care for serious and life-threatening injuries and illnesses. Our care teams listen to quickly understand your health needs and deliver care that's right for you. Ascension Providence Hospital - Southfield is a destination for specialty care - including advanced heart and neuroscience care, comprehensive cancer services, orthopedics, women's health and pediatric care. Our OB-GYN maternity care teams deliver a personalized birthing experience including alternative birthing options and advanced neonatal care for sick babies. We provide a wide range of minimally invasive surgical procedures using robotic-assisted technology, imaging and lab tests, and a dedicated inpatient rehabilitation center, all on one campus.
Ascension Providence Hospital - Novi campus is a full-service hospital with 24/7 emergency care, a Level II Trauma Center, and a Comprehensive Stroke Center. We deliver advanced surgical care for serious and life-threatening injuries and illnesses. Our care teams listen to quickly understand your health needs and deliver care that's right for you. Ascension Providence Hospital - Novi is a destination for specialty care - including advanced heart and neuroscience care, comprehensive cancer services, orthopedics, women's health and pediatric care. Our OB-GYN maternity care teams deliver a personalized birthing experience. We provide a wide range of minimally invasive surgical procedures using robotic-assisted technology, imaging and lab tests, and a dedicated inpatient rehabilitation center, all on one campus.

Combined beds between Novi and Southfield campuses are 628.

Ascension River District Hospital

Ascension River District Hospital is a full-service 68-bed hospital with 24/7 emergency care and surgical specialists. Our doctors and care teams deliver personalized care for serious and life-threatening injuries and illnesses. We listen to quickly understand your health needs to deliver care that is right for you. Our OB-GYN maternity care services and Birthing Center offer a personalized birthing experience. At Ascension River District, we deliver a wide range of diagnostic imaging, lab tests, respiratory therapy, and rehabilitation therapy services all on one campus.

Ascension Brighton Center for Recovery

Ascension Brighton Center for Recovery provides compassionate, personalized care to those struggling with drug or alcohol dependence. This has been our goal from the beginning. We work to change lives every day. And we bring a unique combination of professional expertise and personal experience to the job. The Center has 70 beds and is the first addiction treatment center to be licensed in Michigan and the second-oldest alcohol and drug treatment facility in the United States. For more than 60 years, Ascension Brighton Center for Recovery has been helping equip our patients with the tools they need to live clean and sober lives.
Ascension Southeast Michigan Community Health Department

Ascension SEM hospitals are one of very few health systems in the country that has an entire department devoted to serving the community. It is a wholly owned 501c 3 subsidiary of Ascension Michigan. The mission of the Ascension SEM Community Health Department is to improve the health status of the community, including the poor and underserved, to be accomplished through strategic partnerships with other health care providers, physicians, public health agencies, businesses, social services, civic and religious organizations, that build on the community's strengths, and value of the uniqueness and diversity of each neighborhood therein.

Supported by the Ascension SEM hospitals and other federal, state, and local grants, the department offers a range of programs that include, but is not limited to: faith community nursing, community health education, health fairs and screenings, wellness centers, maternal infant health program, open arms grief support services, human trafficking education and referrals, school based health centers and other programs services to improve the health and quality of life of service area residents. The department strategies and programs are informed and guided by the CHNA.

About the Community Health Needs Assessment

A community health needs assessment, or CHNA, is essential for community building and health improvement efforts, and directing resources where they are most needed. CHNAs can be powerful tools that have the potential to be catalysts for immense community change.

Purpose of the CHNA

A CHNA is “a systematic process involving the community to identify and analyze community health needs and assets in order to prioritize, plan, and act upon unmet community health needs.” The process serves as a foundation for promoting the health and well-being of the community by identifying the most pressing needs, leveraging existing assets and resources, developing strategic plans, and mobilizing hospital programs and community partners to work together. This community-driven approach aligns with Ascension Southeast Michigan hospitals’ commitment to offer programs designed to address the health needs of a community, with special attention to persons who are underserved and vulnerable.

IRS 501(r)(3) and Form 990, Schedule H Compliance

The CHNA also serves to satisfy certain requirements of tax reporting, pursuant to provisions of the Patient Protection and Affordable Care Act of 2010, more commonly known as the Affordable Care Act (ACA). As part of the ACA, all not-for-profit hospitals are required to conduct a CHNA and adopt an implementation strategy every three years. Requirements for 501(c)(3) Hospitals Under the Affordable Care Act are described in Code Section 501(r)(3), and include making the CHNA report (current and previous) widely available to the public. In accordance with this requirement, electronic reports of both the CHNA and the implementation strategy can be found at https://healthcare.ascension.org/CHNA and paper versions can be requested at Ascension SEM Community Health Department, 28000 Dequindre Rd., Warren, MI 48092, or phone (586) 753-0649.

1 Catholic Health Association of the United States (https://www.chausa.org)
Community Served and Demographics

A first step in the assessment process is clarifying the geography within which the assessment occurs and understanding the community demographics.

Community Served

For the 2021 CHNA, Ascension SEM hospitals have defined the community served as the counties where the five (5) hospitals reside: Livingston, Macomb, Oakland, St. Clair, and Wayne (City of Detroit). Although the hospitals serve the southeast Michigan region and surrounding areas, the “community served” was defined as such because (a) most of our service area is in each county; (b) most of our assessment partners define their service area at the county level; and (c) most community health data is available at the county level.
Southeast Michigan, also known as Southeastern Michigan, is located in the lower peninsula of the state and covers 3,573 square miles in five counties. The region comprises 42% of the state's population, and consists of both rural, urban and suburban communities, anchored by the city of Detroit. Southeast Michigan is home to a diverse population with residents of all ages and abilities, who represent various races and ethnicities, and who speak a number of languages. For more than 100 years, the Detroit region's well-connected transportation infrastructure has served the automotive industry's supply chain and is well-positioned to become the next transportation logistics hub. With a vastly integrated highway and freeway system, seven international border crossings, five major airports and several airfields, four public transportation authorities, a deep water marine port and eight rail yards, people and goods move easily throughout the region, United States and North America.

### Demographic Data

The five counties that make up Ascension SEM hospitals service area include: Livingston, Macomb, Oakland, St. Clair, and Wayne (City of Detroit). Southeast Michigan, which includes metropolitan Detroit, makes up approximately 42% of the state's population. Populations have relatively remained the same compared to 2019, with all counties becoming more racially and culturally diverse. Table 1 displays the demographic data highlights for the southeastern Michigan counties.

Process and Methods Used

Ascension SEM hospitals are committed to using national best practices in conducting the CHNA. Health needs and assets for southeastern Michigan were determined using a combination of data collection and analysis for both secondary and primary data, as well as community input on the identified and significant needs.

Community Health Improvement Approach

Ascension SE Michigan hospitals’ approach relies on the model developed by the County Health Rankings and Roadmaps and the Robert Wood Johnson Foundation, utilizing the determinants of health model as the model for community health improvement. The County Health Rankings and Roadmaps’ Take Action Cycle for community health improvement, which includes the following:

- Gather information to assess needs and resources.
- Set priorities, so you can focus on what’s important.
- Find the most effective approaches to address your priorities.
- Get to work on what’s important.
- Evaluating throughout the cycle will help you improve your strategies and ensure that what you’re doing is effective.

Throughout the entire process, communication and collaborative work is essential and critical.

Consultant

With the contracted assistance of Southeastern Michigan Health Association (SEMHA), Ascension SEM hospitals completed its 2021 CHNA. SEMHA was incorporated in 1956 as a non-profit organization. Through its Center for Population Health Unit, they work to ensure there is no lack of population health data. The Center translates data into information for effective decision-making. Using shared databases and applying a sophisticated understanding of statistics along with advanced data-processing technology. The Center also helps organizations frame the right questions, identify, and gather the essential data needed to get answers and curate plans to facilitate an appropriate course of action. They are a region-wide resource to offer specialized expertise, sophisticated technological capability and a unique understanding of organizational structure to communities and agencies throughout Southeastern Michigan.

SEMHA utilized a hybrid model with primary components of the Healthy Communities Model and the Mobilizing for Action through Planning and Partnerships (MAPP) model. SEMHA was contracted to collect the secondary data for over 30 indicators and to analyze the primary and secondary data.
SEMHA utilized an array of data sources for the secondary data including the U.S. Census Bureau, Southeast Michigan Council of Governments (SEMCOG), Center for Educational Performance, Michigan Department of Health and Human Services (MDHHS), State of Michigan Coronavirus Dashboard, MDHHS Behavioral Risk Factor Surveillance System, National Survey on Drug Use, Centers for Disease Control and Prevention, and the U.S. Environmental Protection Agency.

**Data Collection Methodology**

**Summary of Community Input**

Recognizing its vital importance in understanding the health needs and assets of the community, Ascension SEM Community Health consulted with a range of public health and social service providers that represent the broad interest of the defined community served in the southeast Michigan area. A concerted effort was made to ensure that the individuals and organizations represented the needs and perspectives of: 1) public health practice and research; 2) individuals who are medically underserved, are low-income, or considered among the minority populations served by the hospital; and 3) the broader community at large and those who represent the broad interests and needs of the community served.

Multiple methods were used to gather community input, including key stakeholder focus groups and community surveys for adults and youth.

- A community survey was shared with the local health departments in the southeast Michigan area. Ascension SEM hospitals requested the health departments to list the survey in their public areas, and in their local communications such as electronic newsletters. To fulfill the requirement of including members of medically underserved, low-income, and minority populations, we received community input from some of our family practices that serve this population.
- Also, we surveyed the consumers of our School-Based Health Centers (SBHC), which includes residents in the area of the SBHC. Most of our SBHCs are located in low-income and medically underserved communities like Detroit. Other populations included our faith-based partnerships and churches around southeast Michigan.
- For the key stakeholder focus groups, we invited our partners that particularly serve minority communities and special populations. Some of the organizations in our focus groups included the local health department, senior services organizations, non-profit organizations that serve minority groups.

These methods provided additional perspectives on how to select and address top health issues facing southeast Michigan. A summary of the process and results is outlined in the following pages.
Surveys

A survey was conducted by Ascension SEM Community Health Department to gather the perceptions, thoughts, opinions, and concerns of the community regarding healthy behaviors, mental health, physical health, substance use, Social Determinants of Health (SDoH), access to care, COVID-19 for southeast Michigan (Wayne (city of Detroit), Oakland, Macomb, Livingston, and St. Clair counties). A total of 872 individuals participated in the survey, held between September 2021 and November 2021. The data gathered and analyzed from youth and the community provides valuable insight into the issues of importance to the community.

- The adult (general) community survey contained 36 questions, and was distributed to adults age 18+ by email, paper surveys located in medical centers, and shared electronically through our partner organizations. 751 responses were received.
- The youth community survey contained 24 questions, and was distributed to students in the Ascension MI school based health centers through electronic and paper surveys. 121 responses were received.
- The key stakeholder survey contained 8 questions, and was distributed electronically through our partner organization and during the key stakeholders focus group sessions. 23 responses were received.

### Surveys

#### Key Summary Points

- 38.29% of respondents described their overall health as “Very Good”
- Based on the respondents opinion, Mental & Behavioral Health, COVID-19, and Obesity are the greatest health concerns of the community
- 51.29% of respondents answered they feel “Safe” in their community, where they work, live and play
- The respondents listed Mental Health, Transportation, and Substance Abuse as the top 3 weaknesses of their community
- 87.15% of respondents informed that they have received the COVID-19 vaccine

#### Meaningful Quotes

- In response to the question, "The three (3) most important behaviors that put your community most at risk?", one respondent stated "Addressing mental health in the community with professional help. It is delayed until a situation is dangerous, or people are ignorant to the levels of help available/overall importance and benefits."
Key Stakeholders Focus Groups

Key Stakeholder focus groups were conducted by Ascension SEM Community Health to gather feedback from key stakeholders on the health needs and assets of southeast Michigan (Wayne [City of Detroit], Oakland, Macomb, Livingston, and St. Clair counties). The focus groups were held between August 2021 and October 2021. Participants included stakeholders within the southeast Michigan area that works with local health departments, federally qualified health clinics, nonprofit and community organizations, mental health organizations, youth serving organizations, senior serving organizations, education leaders and local school districts, faith-based organizations, local government officials and law enforcement.

Key Stakeholders Focus Groups

Key Summary Points

- The pandemic has increased the need for mental health services due to loss, grief, trauma, and isolation.
- An increase in the obesity rate due to the lack of movement during the pandemic restrictions.
- Access to services is a huge concern and the biggest focus right now.

COVID-19 Related Concerns:
- Grief, Fear, Isolation, Access to care, Access to health produce, housing concerns, unemployment and educational level concerns, concern and hesitancy around the vaccine

Meaningful Quotes

- “Mental health has been the target for the last year and a half, their service intake has increased due to the pandemic, dealing with families that had an increase of diabetes and anxiety, laid off and uncertainty about health and covid and whether you can put food on the table. There has been a 138% increase in intake over the last year and a half.”
- “People are tapped out and dealing with trauma” in response to COVID-19.

To view community input data in its entirety, see Appendix C (page 39).
Summary of Secondary Data

Secondary data is data that has already been collected and published by another party. Both governmental and non-governmental agencies routinely collect secondary data reflective of the health status of the population at the state and county level through surveys and surveillance systems. Secondary data was compiled from various sources that are reputable and reliable.

Health indicators in the following categories were reviewed:

- Health Outcomes
- Social and Economic Factors that impact health
- Health Behaviors
- Access to Healthcare
- Disparities

The secondary data collected and analyzed through this assessment is referenced and highlighted in the significant needs tables in the Community Needs Section of this report. To view secondary data and sources in its entirety, see Appendix D (page 45).

Summary of COVID-19 Impact in Southeast Michigan

The COVID-19 pandemic has had an impact on communities world-wide. In the United States, urban communities were the hardest hit for both COVID cases and death. Profound disparities emerged as the pandemic grew. Older Americans have the highest risk of death from COVID than any other age group with 81% of deaths from COVID to people over 65 years of age. There are significant disparities by race and ethnicity as well. Americans of color have higher risk of exposure, infection, and death compared to non-Hispanic White Americans.3

Significant COVID-19 disparities include:

- Hispanic Persons at 2.3 times the risk of death
- non-Hispanic Black persons at 1.9 times the risk of death
- American Indian or Alaska Native at 2.4 times the risk of death

Some reasons for these differences include:

- Multigenerational families
- Living in crowded housing with close physical contact
- Working in environments in which social distancing is not possible
- Inadequate access to health care
- Higher rates of underlying conditions4

Written Comments on Previous CHNA and Implementation Strategy

Ascension SEM hospitals’ previous CHNA and implementation strategy were made available to the public and open for public comment via the website: [https://healthcare.ascension.org/chna](https://healthcare.ascension.org/chna). No comments were received.

Data Limitations and Information Gaps

Although it is comprehensive, this assessment cannot measure all possible aspects of health and cannot represent every possible population within southeast Michigan. This constraint limits the ability to fully assess all the community's needs.

For this assessment, three types of limitations were identified:

- Some groups of individuals may not have been adequately represented through the community input process. Those groups, for example, may include individuals who are transient, who speak a language other than English, or who are members of the lesbian / gay / bisexual / transgender / questioning+ community.
- Secondary data is limited in a number of ways, including timeliness, reach, and descriptive ability with groups as identified above.
- An acute community concern may significantly impact a Ministry's ability to conduct portions of the CHNA assessment. An acute community concern is defined by Ascension as an event or situation which may be severe and sudden in onset or newly affects a community. These events may impact the ability to collect community input, may not be captured in secondary data, and/or can present in the middle of the three-year CHNA cycle. For the 2021 CHNA, the following acute community concerns were identified: COVID-19, especially mental health and depression exacerbated by COVID-19. Note: The impact of COVID-19 is not reflected in the secondary data.

Despite the data limitations, Ascension SEM hospitals are confident of the overarching themes and health needs represented through the assessment data. This is based on the fact that the data collection included multiple methods, both qualitative and quantitative, and engaged the hospital as well as participants from the community.
Community Needs

Ascension SEM hospitals, with facilitation by Ascension Southeast Michigan Community Health and contracted assistance from Southeastern Michigan Health Association (SEMHA), analyzed secondary data of over 50 indicators and gathered community input through community surveys and key stakeholders focus groups to identify the needs in our defined southeastern Michigan area: Livingston, Macomb, Oakland, St. Clair, and Wayne County (city of Detroit). In collaboration with community partners, Ascension SEM hospitals used a phased prioritization approach to identify the needs. The first step was to determine the broader set of identified needs. Identified needs were then narrowed to a set of significant needs which were determined most crucial for community stakeholders to address.

Following the completion of the CHNA assessment, Ascension SEM hospitals selected a subset of the significant needs as the hospital’s prioritized needs to develop a three-year implementation strategy. Although the hospital may address many needs, the prioritized needs will be at the center of a formal CHNA implementation strategy and corresponding tracking and reporting. The image above also describes the relationship between the needs categories.

Identified Needs

Ascension has defined “identified needs” as the health outcomes or related conditions (e.g., social determinants of health) impacting the health status of our defined southeastern Michigan area: Livingston, Macomb, Oakland, St. Clair, and Wayne County (city of Detroit). The identified needs were categorized into groups such as health behaviors, social determinants of health, length of life, quality of life, clinical care, and systemic issues in order to better develop measures and evidence-based interventions that respond to the determined condition.

Significant Needs

Ascension has defined “significant needs” as the identified needs which have been deemed most significant to address based on established criteria and/or prioritization methods. In collaboration with various community partners, the Ascension SE Michigan hospitals utilized the Hanlon Method to prioritize which of the identified needs were most significant. The Hanlon Method is a long tested Public Health tool that assists stakeholders in identifying priorities from the many health challenges facing communities. This quantitative and qualitative method provides a fair, reasonable, and easy way
to compare different health problems in a relative framework, as equally as possible, and in a somewhat objective manner.

The Hanlon Method individually recognizes the A.) size of the problem, B.) the seriousness of the problem, and C.) the effectiveness of the solution. The proposed solution may then be modified by several other factors such as propriety, economic feasibility, acceptability, resource availability, resource maximization, long-term benefit, economic sustainability, measurability and legality. The Hanlon Method allows stakeholders to identify factors to be considered in setting priorities, organize those factors into groups that are weighted relative to each other, modify those factors as needed, and scores the priorities individually. The direct impact of the Hanlon Method upon measuring outcomes is that the ease and ability of measuring the impact of a proposed solution is a factor within the prioritization process. Therefore, measurability can be insured by its weighting as a significant factor when identifying solutions for the identified issues.

Given the size and scope of the southeast Michigan service area, it is important to understand that several methods were used to determine the most significant needs. The following three aspects of this process were essential in arriving at the most significant needs identified:

1. Utilization of the Hanlon prioritization method with a group of community stakeholders to rank the needs and determine the most significant needs.
2. The collection of community input (primary data) through the 872 surveys.
3. The collection and compiling secondary data or population health statistical data in a format that can be used to inform our understanding of the health needs of the community.

Through the prioritization process for the 2021 CHNA, the significant needs are as follows:

- Chronic Disease, including Diabetes and Cancer
- Diet and Exercise, including Obesity
- Mental and Behavioral Health
- Access to Care

A description (including data highlights, community challenges & perceptions, and local assets & resources) of each significant need are on the following pages. To view health care facilities and community resources available to address the significant needs, please see Appendix E (page 51).
### Chronic Disease, including Diabetes and Cancer

#### Why is it Important?
Chronic diseases lead to an increase in preventable deaths and a decrease in the quality of life. Chronic diseases include: Diabetes, Heart Disease, High Blood Pressure, Obesity and High Cholesterol.

*Source: MDHHS BRFSS, 2018-2020, Age 18+

Across all areas:
- Obese persons ranged from 29% to 40%
- Overweight persons ranged from 31% to 36%

Across all areas:
- Cancer ranged from 8% to 18%
- Diabetes ranged from 9% to 13%
- High blood pressure ranged from 32% to 45%

#### Local Assets & Resources
- Ascension Michigan School Based Health Centers
- National Kidney Foundation
- American Diabetes Association
- Detroit Health Department
- Oakland County Health Department
- Macomb County Health Department
- Livingston County Health Department
- St. Clair County Health Department
- Wayne County Health Department
- City of Novi Parks & Recreation
- City of Howell Parks & Recreation
- City of St. Clair Shores Parks & Recreation
- City of Warren Parks & Recreation
- City of Southfield Parks & Recreation

#### Community Challenges & Perceptions
- Lack of access to primary care and specialists
- Lack of transportation
- Lack of treatment options outside of normal business hours
- Many resources were restricted or unavailable due to the pandemic.
- Fear of contracting the virus

#### Individuals Who Are More Vulnerable
- Persons aged 65 and older are at an increased risk for Chronic Diseases.
- Individuals without insurance are at an increased risk due to lack of screening, prevention and treatment.
- Economic barriers also impair proper screening, prevention and treatment.
- General population spent time quarantined.
### Diet and Exercise, including Obesity

#### Why is it Important?
Lack of physical activity, improper or poor nutritional health leads to an increase in overweight and obesity. Poor diet and the lack of physical activity is also associated with chronic disease, decreasing quality of life and premature death.

#### Local Assets & Resources
- Ascension Michigan Weight Loss Program
- American Heart Association
- Area Agency on Aging 1-A
- Area Agency on Aging 1-B

Across all areas:
- High blood pressure ranged from 31% to 45%.
- No leisure time physical activity ranged from 18% to 33%.
- Those with adequate physical activity ranged from 21% to 35%.
- Obese persons ranged from 29% to 40%.
- Overweight persons ranged from 31% to 36%.
- Poor Physical Health ranged from 18% in Detroit to 8% in Livingston.
- Healthy weight ranged from 32% in Oakland to 27% in Detroit.
- Obesity ranged from 29% in Oakland to 40% in Detroit.

#### Individuals Who Are More Vulnerable
- Persons aged 65 and older are at an increased risk for Chronic Diseases.
- Individuals without insurance are at an increased risk due to lack of screening, prevention and treatment.
- Economic barriers also impair proper screening, prevention and treatment.
- Individuals diagnosed as “overweight” or “obese.”
Mental and Behavioral Health

Why is it Important?

Mental health disorders are medical conditions that disrupt a person's thinking, feeling, mood, ability to relate to other and daily functioning. Mental health issues are associated with increased rates of smoking, physical inactivity, obesity and substance abuse. As a result, these physical health problems can lead to chronic disease, injury, disability and death (including overdose or suicide). During the COVID-19 pandemic, depression, anxiety and suicidal ideation have increased and access to mental health providers and treatment has been limited.

Data Highlights

![Mental Health Condition Chart]

Source: National Survey on Drug Use and Health, 2016-2018 Age 12+

Across all areas:
- Poor Mental Health ranged from 16% to 19%
- Depression-ever told ranged from 19% to 25%
- Serious Mental Health issues ranged from 4% to 5%
- Major depressive episodes ranged from 6% to 7%
- Serious suicidal thoughts report by 4%
- Receiving Mental Health services ranged from 14% to 17%

Local Assets & Resources

- Ascension Michigan School Based Health Centers
- Eastwood Clinics
- Oakland Family Services
- New Hope Center for Grief Support
- St. Clair County Community Mental Health
- Black Family Development
- New Day Foundation for Families
- Chaldean Community Foundation
- Matrix Human Services
- Lighthouse of Oakland County
- Vista Maria
- The Family Center
- Alternatives for Girls
- Catholic Charities of Southeast Michigan
- Catholic Charities Livingston

Community Challenges & Perceptions

- Lack of accessible and affordable mental health care
- Services are not culturally and/or linguistically available

Individuals Who Are More Vulnerable

- Individuals impacted by the isolation and quarantine of COVID-19.
- Individuals impacted by the grief and loss of friends, relatives and co-workers during COVID-19.
- Children and adults impacted by the switch from in-classroom instruction to a virtual, home-based environment.
### Access to Care

#### Why is it Important?

Regular visits to your primary care is an essential component to maintaining good health, experiencing a healthy pregnancy and birth outcome, and for early detection of disease or chronic conditions that can hamper quality of life.

#### Local Assets & Resources

- Ascension School Based Health Centers
- Ascension Maternal Infant Health Program
- FernCare Free Clinic
- Advantage Health Centers
- Chaldean Foundation
- Michigan Association of Physicians of Indian Heritage Clinic
- Detroit Health Connection
- Community First Health Centers
- Oakland Primary Health Services
- Livingston County Health Department
- St. Clair County Health Department

#### Data Highlights

In the Service Area:

- Adequate Prenatal Care (PNC) ranged from 81% in Oakland to 53% in Detroit.
- Intermediate PNC ranged from 31% in Detroit to 15% in Oakland.
- Inadequate PNC ranged from 15% in Detroit to 4% in Oakland.
- Smoking while pregnant ranged from 25% in St. Clair to 6% in Oakland.
- Excessive weight gain ranged from 48% to 42% across the Service Area.

#### Community Challenges & Perceptions

- Affordability
- Individuals with Medicaid may experience difficulty in finding a provider that accepts their insurance.
- Implicit bias
- Fear of contracting the COVID-19 virus caused delays in obtaining health care

#### Individuals Who Are More Vulnerable

- Low income families are less likely to receive care thus more likely to have unmet needs than families with higher incomes.
- Individuals with limited or no insurance are less likely to receive care.
- Those individuals who might be unaware of services.
- Women who delay seeking prenatal care until the second and third trimester.
**Prioritized Needs**

Ascension has defined “prioritized needs” as the significant needs which have been prioritized by the hospitals to address through the three-year CHNA implementation strategy. Ascension SEM hospitals understand the importance of all the health needs of the community and are committed to playing an active role in improving the health of the people in the communities it serves.

Following the completion of the 2021 CHNA, Ascension SEM hospitals, in collaboration with Ascension SEM Community Health Department and Ascension Michigan Community Benefit Center of Expertise, consideration was given to select factors in determining the significant needs that would be selected as prioritized needs. A select group of subject matter experts in the form of the CHNA steering committee considered the factors below:

- Is the need one that can be measured/tracked over time?
- Does the need align with overall available and potentially available resources and partner opportunities?
- Does the need align with overall health system strategy and focus areas for community impact?

After thorough consideration, Ascension SEM hospitals’ selected the following prioritized needs outlined below for its 2021 implementation strategy.

- **Mental Health** (includes stress, anxiety and depression) - This need was selected because of the ranking and data and its focus as a generalized area of vulnerability in the overall Southeast Michigan population.

- **Healthy Behaviors and Chronic Disease Issues** - This need was selected because of trending indicating increases in chronic disease as well as survey data indicating a lack of opportunities for regular physical activity and the trending toward obesity and overweight. These represent significant risk factors for many chronic diseases. Therefore the promotion of healthy lifestyles was selected.

- **Access to Care** (with emphasis on maternal and infant health) - This need was selected because of more current data trending indicating an increase in the number of persons expressing problems accessing care due to costs and other factors. Also the current trending around the increase in maternal death rate and the slowed reduction in infant mortality in Southeast Michigan.

It’s important to note that all significant needs will be addressed as prioritized needs within the 3-year implementation strategy. After evaluating Ascension SEM hospital’s resources, program strengths, partnerships, and capacity to make an impact, the four significant needs were modified (in title) and became the three prioritized needs, thus addressing all significant needs.
Summary of Impact from the Previous CHNA Implementation Strategy

An important piece of the three-year CHNA cycle is revisiting the progress made on the prioritized needs within the preceding CHNA. By reviewing the actions taken to address the prioritized needs and evaluating the impact those actions have made in the community, it is possible to better target resources and efforts during the next CHNA cycle.

The three (3) prioritized needs for the 2019 CHNA Implementation Strategy plan are outlined below. Highlights from impact made include:

- **Obesity Reduction and Diabetes Prevention** - Implemented the Center for Disease Control and Prevention (CDC) Diabetes Prevention Program (DPP) and over 150 participants were served through the program. One of the DPP goals was for participants to lose at least 5% of their weight; about 70% of participants have lost at least 5% of their weight and nearly 1,000 total lbs lost across all DPP cohorts. Prior to COVID-19, the program was offered in-person; however, it swiftly transitioned to virtual. During the COVID-19 pandemic, Ascension Southeast Michigan Community Health Department applied and was granted CDC approval for Long Distance Learning status (virtual DPP classes).

- **Mental Health/Substance Abuse** - Increased access to mental health programs/services for children and youth by adding programs/services in over 10 School Based Health Centers.

- **Improving Maternal/Infant Health** - Through the Maternal Infant Health Program (MIHP), 65% of women enrolled, and seen by Ascension physicians, achieved adequate prenatal care (7 to 13 prenatal care visits)

Written input received from the community and a full evaluation of our efforts to address the significant health needs identified in the 2019 CHNA can be found in Appendix F (page 53).
Approval by Ascension Southeast Michigan Board of Trustees

To ensure the Ascension SEM hospital's efforts meet the needs of the community and have a lasting and meaningful impact, the 2021 CHNA was presented to the Ascension Southeast Michigan Board of Trustees for approval and adoption on June 20, 2022. Although an authorized body of the hospital must adopt the CHNA and implementation strategy reports to be compliant with the provisions in the Affordable Care Act, adoption of the CHNA also demonstrates that the board is aware of the findings from the community health needs assessment, endorses the priorities identified, and supports the strategy that has been developed to address prioritized needs.
Conclusion

The purpose of the CHNA process is to develop and document key information on the health and wellbeing of the communities Ascension SEM hospitals serve. This report will be used by internal stakeholders, non-profit organizations, government agencies, and other community partners of Ascension SEM hospitals to guide the implementation strategies and community health improvement efforts as required by the Affordable Care Act. The 2021 CHNA will also be made available to the broader community as a useful resource for further health improvement efforts.

Ascension SEM hospitals hope this report offers a meaningful and comprehensive understanding of the most significant needs for residents of southeast Michigan. As a Catholic health ministry, Ascension SEM hospitals are dedicated to spiritually centered, holistic care that sustains and improves the health of not only individuals, but the communities it serves. With special attention to those who are poor and vulnerable, we are advocates for a compassionate and just society through our actions and words. Ascension SEM hospitals are dedicated to serving patients with compassionate care and medical excellence, making a difference in every life we touch.

Ascension SEM hospitals value the community's voice and welcome feedback on this report. Please visit this public website (https://healthcare.ascension.org/chna) to submit your comments.
Appendices

Table of Contents

  - Appendix A: Definitions and Terms
  - Appendix B: Community Demographic Data and Sources
  - Appendix C: Community Input Data and Sources
  - Appendix D: Secondary Data and Sources
  - Appendix E: Health Care Facilities and Community Resources
  - Appendix F: Evaluation of Impact From Previous CHNA Implementation Strategy
Appendix A: Definitions and Terms

**Acute Community Concern**
An event or situation which may be severe and sudden in onset, or newly affects a community. This could describe anything from a health crisis (e.g., COVID-19, water poisoning) or environmental events (e.g., hurricane, flood) or other event that suddenly impacts a community. The framework is a defined set of procedures to provide guidance on the impact (current or potential) of an acute community concern. Source: Ascension Acute Community Concern Assessment Framework

**Collaborators**
Third-party, external community partners who are working with the hospital to complete the assessment. Collaborators might help shape the process, identify key informants, set the timeline, contribute funds, etc.

**Community Focus Groups**
Group discussions with selected individuals. A skilled moderator is needed to lead focus group discussions. Members of a focus group can include internal staff, volunteers and the staff of human service and other community organizations, users of health services and members of minority or disadvantaged populations. Source: [www.chausa.org/communitybenefit/assessing-and-addressing-community-health-needs](http://www.chausa.org/communitybenefit/assessing-and-addressing-community-health-needs)

**Community Served**
A hospital facility may take into account all the relevant facts and circumstances in defining the community it serves. This includes: The geographic area served by the hospital facility; Target populations served, such as children, women, or the aged; and Principal functions, such as a focus on a particular specialty area or targeted disease.

**Consultants**
Third-party, external entities paid to complete specific deliverables on behalf of the hospital (or coalition/collaborators); alternatively referred to as vendors.

**Demographics**
Population characteristics of your community. Sources of information may include population size, age structure, racial and ethnic composition, population growth, and density. Source: [www.chausa.org/communitybenefit/assessing-and-addressing-community-health-needs](http://www.chausa.org/communitybenefit/assessing-and-addressing-community-health-needs)

**Identified Need**
Health outcomes or related conditions (e.g., social determinants of health) impacting the health status of the community served

**Key Stakeholder Interviews**
A method of obtaining input from community leaders and public health experts one-on-one. Interviews can be conducted in person or over the telephone. In structured interviews, questions are prepared and standardized prior to the interview to ensure consistent information is solicited on specific topics. In less structured interviews, open-ended questions are asked to elicit a full range of responses. Key informants may include leaders of community organizations, service providers, and elected officials. Individuals with a special knowledge or expertise in public health may include representatives from your state or local health department, faculty from schools of public health, and providers with a background in public health. See Section V for a list of potential interviewees. Could also be referred to as Stakeholder Interviews. Source: [www.chausa.org/communitybenefit/assessing-and-addressing-community-health-needs](http://www.chausa.org/communitybenefit/assessing-and-addressing-community-health-needs)

**Medically Underserved Populations**
Medically Underserved Populations include populations experiencing health disparities or that are at risk of not receiving adequate medical care because of being uninsured or underinsured, or due to geographic, language,
financial, or other barriers. Populations with language barriers include those with limited English proficiency. Medically underserved populations also include those living within a hospital facility’s service area but not receiving adequate medical care from the facility because of cost, transportation difficulties, stigma, or other barriers. 

**Prioritized Need**
Significant needs which have been selected by the hospital to address through the CHNA implementation strategy.

**Significant Need**
Identified needs which have been deemed most significant to address based on established criteria and/or prioritization methods.

**Surveys**
Used to collect information from community members, stakeholders, providers, and public health experts for the purpose of understanding community perception of needs. Surveys can be administered in person, over the telephone, or using a web-based program. Surveys can consist of both forced-choice and open-ended questions.

Appendix B: Community Demographic Data and Sources

The tables below provide a description of the community’s demographics. The descriptions of the importance of the data are largely drawn from the County Health Rankings and Roadmaps website.

### Population

Why it is important: The composition of a population, including related trends, is important for understanding the community context and informing community planning.

### Population by Race or Ethnicity

Why it is important: The race and ethnicity composition of a population is important in understanding the cultural context of a community. The information can also be used to better identify and understand health disparities.

Population by Age
Why it is important: The age structure of a population is important in planning for the future of a community, particularly for schools, community centers, healthcare and child care. A population with more youths will have greater education needs and child care needs, while an older population may have greater healthcare needs.

Income
Why it is important: Median household income and the percentage of children living in poverty, which can compromise physical and mental health, are well-recognized indicators. People with higher incomes tend to live longer than people with lower incomes. In addition to affecting access to health insurance, income affects access to healthy choices, safe housing, safe neighborhoods and quality schools. Chronic stress related to not having enough money can have an impact on mental and physical health. ALICE, an acronym for Asset Limited, Income Constrained, Employed, are households that earn more than the U.S. poverty level, but less than the basic cost of living for the county. Combined, the number of poverty and ALICE households equals the total population struggling to afford basic needs.

Education
Why is it important: There is a strong relationship between health, lifespan and education. In general, as income increases, so does lifespan. The relationship between more schooling, higher income, job opportunities (e.g., pay, safe work environment) and social support, help create opportunities for healthier choices.

**Inspired/Uninsured**

Why it is important: Lack of health insurance can have serious health consequences due to lack of preventive care and delays in care that can lead to serious illness or other health problems.

Appendix C: Community Input Data and Sources

**Adult Community Survey**
The adult (general) community survey contained 36 questions, and was distributed to adults age 18+ by email, paper surveys located in medical centers, and shared electronically through our partner organizations. 751 responses were received. The following questions were asked:

1. Please type in the 5-digit zip code where you live.
2. Which category includes your age?
3. How much total combined money did all members of your household earn during 2020 before taxes?
4. What is the highest level of education you have received?
5. Which of the following best describes your race?
6. Which of the following best describes your ethnicity?
7. What gender do you identify with? Select all that apply.
8. What language do you speak at home?
9. Thinking about your mental and emotional health, for how many days during the past 30 days was your mental or emotional health not good?
10. Thinking about your physical health for how many days during the past 30 days was your physical health not good?
11. Compared to 1 year ago, how would you rate your physical health in general now?
12. In general how do you describe your overall health?
13. In your opinion, which of the following are the greatest health concerns for your community? Select up to three. List of possible answer/options to be listed as help text (recommended options).
14. In the following list, what do you think are the three most important behaviors that put your community at risk?
15. Do you now smoke cigarettes every day, some days, or not at all?
16. Do you use electronic cigarettes every day, some days rarely, or not at all?
17. During the past month, how many times per week did you eat fruits and vegetables? Do not include juices.
18. On average, how many hours of sleep do you get in a 24-hour period?
19. What is your best estimate of the number of days you drank alcohol during the past 30 days?
20. What is your best estimate of the number of days you drank alcohol during the past 30 days?
21. How safe do you feel in your community, where you work, live and play?
22. How do you typically get to and from places in and around the community you live?
23. In the past 12 months how often were you worried food would run out before you could buy more?
24. Do you live close to a grocery store?
25. What are the top 3 strengths of your community?
26. What are the top 3 weaknesses of your community?
27. How long has it been since your last routine health checkup in-person or virtually (such as talking by phone or video on tablet or laptop)?
28. Is everyone in your household covered by health insurance?
29. If YES: what types of coverage do you have: (Mark all that apply.)
30. During the past 12 months, did you need: (answer for each type of care): Medical care, Dental care, Behavioral/mental health care, Substance abuse care, Prenatal care
31. If YES, If one or more types of care was needed and not received, why not? (Mark all that apply.)
32. Was there any time when you DELAYED getting medical care because of the coronavirus pandemic?
33. Have you, or has anyone in your household experienced a loss of employment income since March 13, 2020 due to the coronavirus?
34. During the 2020 COVID pandemic, how has your sitting and screen time changed?
35. During the 2020 COVID pandemic, how has your physical activity changed?
36. Have you received a COVID-19 vaccine?
37. During the 2020 COVID pandemic, how have your stress and anxiety levels changed?

**Youth Community Survey**
The youth community survey contained 24 questions, and was distributed to students in the Ascension SEM School-Based Health Centers through electronic and paper surveys. 121 responses were received. The following questions were asked:

1. What is your sex?
2. What is your race?
3. How old are you?
4. What city do you live in?
5. What language do you and your family speak at home?
6. Thinking about your mental health, during the last 30 days, how many days did you feel so sad or hopeless that it stopped you from doing some usual activities?
7. How is your health most of the time?
8. In your opinion, which of the following are the greatest health concerns for your community? Select up to 3.
9. In the following list, what do you think are the 3 most important behaviors that put your community at risk?
10. Do you smoke cigarettes and/or e-cigarettes/vaping?
11. If yes, how many days in a week do you smoke cigarettes and/or e-cigarettes/vaping?
12. How many servings of fruits and vegetables do you eat each day?
13. On an average school night, how many hours of sleep do you get?
14. Do you drink alcohol?
15. If yes, how much alcohol do you drink in a week?
16. How do you typically get to and from places in and around the community you live?
17. In the past 12 months, how often were you worried food would run out before you could get more?
18. How safe do you feel in your community, where you go to school, live and play?
19. What are the top 3 strengths of your community?
20. What are the top 3 weaknesses of your community?
21. In the last year (12 months), have you seen (virtual visit) or been (in person) to a doctor?
22. During the 2020 COVID-19 pandemic, how has your sitting and screen (tv, cell phone, tablet, video games) time changed?
23. During the 2020 COVID-19 pandemic, how has your physical activity changed?
24. Have you received a COVID-19 vaccine?
Key Stakeholder Survey
The key stakeholder survey contained 8 questions, and was distributed electronically through our partner organization and during the key stakeholders focus group sessions. 23 responses were received.

1. What populations does your organization primarily serve?
2. Please list the 5 digit zip codes of the areas you primarily serve.
3. In your opinion, which of the following are the greatest health concerns for your community? Select up to 3.
4. In the following list, what do you think are the 3 most important behaviors that put your community most at risk?
5. What are the top 3 strengths of your community?
6. What are the top 3 weaknesses of your community?
7. What would improve the quality of life for those within your community?
8. Which of the following have been the biggest challenges for your community as a result of the COVID-19 pandemic? Select all that apply.

Key Stakeholders Focus Groups
Key Stakeholder focus groups were conducted by Ascension SEM Community Health to gather feedback from key stakeholders on the health needs and assets of southeast Michigan (Wayne [City of Detroit], Oakland, Macomb, Livingston, and St. Clair counties). The following questions were asked:

Priority Needs
1. In Ascension Southeast Michigan's previous community health needs assessment, or CHNA, Obesity reduction and Diabetes prevention, Mental Health/Substance Abuse Prevention, and Improving Maternal/Infant Health was identified as a need.
   - Has this issue gotten better, gotten worse, or remained the same?
   - In your personal opinion, does it remain a significant need?

   (Continue with a list of identified needs from the previous CHNA cycle.)

2. Other than the needs we just discussed, what are the most important health issues that you see in your community?

Social Determinants of Health and Access to Care
3. What are the most important social issues that you see in your community?

4. What specific populations, if any, are disproportionately affected by the issues just mentioned?

5. Are you aware of social factors that influence the issues we’ve discussed for your community? If so, what social factors have the biggest influence?

6. What health services are lacking for the people with whom you work?

COVID-19 and Strategies and Approaches to moving forward
7. What have been some of the challenges for your clients/customers as a result of the COVID-19 pandemic? (i.e. Access to care, employment, lack of food/healthy food).
Community Advisory Committee (CAC) Input

In 2020, Ascension Southeast Michigan Community Health established Community Advisory Committees (CAC) composed of a diverse group of key stakeholders including educators, business and faith leaders, nonprofit and public agencies serving infants, children and seniors, to establish, maintain and/or enhance its relationships with the community.

For the 2021 CHNA, members of the CACs, along with others from the five county service area, were invited to participate in the prioritization process held on April 20, 2022. The table below outlines those who participated:

**Physical Environment**

Why they are important: The physical environment is where people live, learn, work, and play. The physical environment impacts our air, water, housing and transportation to work or school. Poor
physical environment can affect our ability and that of our families and neighbors to live long and healthy lives.

**Clinical Care**

Why it is important: Access to affordable, quality care can help detect issues sooner and prevent disease. This can help individuals live longer and have healthier lives.

### Health Behaviors

Why they are important: Health behaviors are actions individuals take that can affect their health. These actions can lead to positive health outcomes or they can increase someone's risk of disease and premature death. It is important to understand that not all people have the same opportunities to engage in healthier behaviors.

Appendix E: Health Care Facilities and Community Resources

As part of the CHNA process, Ascension SEM hospitals have cataloged resources available in Livingston, Macomb, Oakland, St. Clair, and Wayne (City of Detroit) counties that address the significant needs identified in this CHNA. Resources may include acute care facilities (hospitals), primary and specialty care clinics and practices, mental health providers, and other non-profit services. State and national resources can also provide information regarding programs that can better serve the needs of a person experiencing a specific problem.

The resources listed under each significant need heading is not intended to be exhaustive.

Appendix F: Evaluation of Impact from the Previous CHNA Implementation Strategy

Ascension SEM hospital’s previous CHNA implementation strategy was approved in September 2019, and addressed the following priority health needs: Obesity reduction and Diabetes Prevention, Mental Health/Substance Abuse Prevention, and Improving Maternal/infant Health. The table below describes the actions taken during the 2020-2022 CHNA to address each priority need and indicators of improvement. The Public Health Emergency due to the pandemic impacted our ability to complete many of our strategies, though some areas were able to continue providing services in a virtual setting after a short period of transition.

Note: At the time of the report publication (e.g., June 2022), the fourth quarter of the third year of the cycle will not be complete. The results reflect Fiscal Years 2020-2021 (Years 1-2), and through the third quarter of Fiscal Year 2022 (Year 3).
