

CONSOLIDATED
LABORATORY SERVICES

St. Vincent's HealthCare

April 13, 2015

Dear Provider,

Beginning April 15, 2015, United Healthcare will move forward with the Laboratory Benefit Management Program for fully insured UHC commercial members in Florida.

Currently, only laboratories classified as Independent Laboratories are required to participate in this pilot program and be listed as a Laboratory of Choice on the BeaconLBS website; hospital-based laboratories are not part of the pilot program but can continue to provide laboratory services to United Healthcare members even though they are not listed as a Laboratory of Choice.

As a department of St. Vincent's Medical Center and a hospital-based laboratory, Consolidated Laboratory Services will continue to be able to accept all United Healthcare patients including UHC commercial members. There will be no financial penalty for any UHC commercial patient to have testing done by Consolidated Laboratory Services.

Healthcare continues to be an ever-changing environment. Additional questions related to Consolidated Laboratory Services' role in providing quality laboratory testing to you and all your United Healthcare patients may be directed to:
