

## 2018 Prevention & Screening Programs Annual Report

### 2018 Public Reporting

St. Vincent Indianapolis Cancer Care Community Outreach and Screening Services provides screening mammograms, skin screenings, lung scans, head and neck screenings, gynecologic exams and colon screenings, as well as cancer education, across Central Indiana.

Interactive workshops and presentations, designed to educate the community about the importance of the early detection of cancer, are customized to fit the needs of each individual group, business or community event.

Men and women are educated on health topic related to prevention, early detection, cancer risk factors, common symptoms of various cancer types, types of screenings, diet and exercise.

Screening Type	Total Number of Participants	Number of Abnormals
Cervical / HPV	52	4
Colon	5	0
Skin	65	-
Prostate	40	5
Cancer Related Screening (Glucose & Cholesterol)	63	18
Thyroid & Oral Screenings – Scheduled for 2019		
<b>TOTAL NUMBER OF SCREENING PARTICIPANTS</b>	<b>225</b>	<b>27</b>

The program also provides on-site mammograms for multiple businesses and community partners, providing ease of access for working women and free mammograms for those women who are uninsured, underinsured or facing high deductible.

As of September 2018, the mobile screening unit has provided 442 free mammograms to uninsured and underinsured women through collaboration with local community partners, which include:

- Hope Family
- Trinity Clinic
- Shalom Health Free Clinic
- Alivio Center
- Latino Health Organization
- Raphael Center
- Genneserat Free Clinic
- St. Vincent Primary Care Clinic
