# 2019 Community Outreach Report

## 2019 Cancer Screening Activities

Activity	# of participants	Referrals	positive findings
Colonoscopy screening	78	1	1
Prostate Screenings	15	3	3

## 2019 Cancer Prevention Program

Activity	Educational focus	Goal	National treatment guideline designed by
Smoking cessation	Harmful effects of tobacco use and importance of quitting.	Because of the significant number of smokers within the community (higher than average), smoking cessation will continue to be offered through the quit line. Personal counseling is also offered via resources within the hospital.	American Cancer Society
Elwood Glass Festival-Education and cancer awareness on breast, colon and lung cancer and HPV vaccination	Lifestyles, awareness, early detection, identification and treatment	Educate the community on the role lifestyle choices may play in the diagnosis of malignancy. Promote smoking cessation programs and HPV vaccinations. Identify barriers in access to healthcare.	American Cancer Society
Colorectal-Education and Awareness	Awareness for early detection of colorectal malignancy.	Education for early warning signs and lifestyle choices.	American Cancer Society
Health Fair - Frankton	Lifestyles, awareness, early detection, identification and treatment	Educate the community on the role lifestyle choices may play in the diagnosis of malignancy. Promote smoking cessation programs and HPV vaccinations. Identify barriers in access to healthcare.	American Cancer Society
Just for the Health of it	Health awareness for women	Provision of education on women's health as well as multiple screening opportunities.	American Cancer Society
Prostate screenings - digital and PSA	Men's health	Digital prostate exam, PSA lab draw and provision of education on men's health	American Cancer Society and American Urological Association
