

# Ascension Providence Center for Fibroids and Minimally Invasive Gynecologic Surgery

We are the first multidisciplinary fibroid center in Metro Detroit that provides sophisticated and collaborative care for women by a team of board-certified, fellowship-trained specialists led by gynecologists.

We provide a high-quality, patient-centered, comprehensive and multidisciplinary approach to the diagnosis and treatment of uterine fibroids and other gynecologic problems.

We evaluate each woman's unique situation, realizing that no single solution is best. Together we will discuss treatment options, including watchful waiting, medical therapy, and surgery, to create a plan that meets each woman's immediate medical goals, and promotes long-term health.

Our team of specialists includes gynecologic robotic surgeons, interventional radiologists, and hematologists.

In addition to traditional treatments, our specialists also have options that are less invasive and can preserve a woman's fertility.

**We provide a complete range of services for treatment of:**

- Fibroids
- Endometriosis
- Adenomyosis
- Abnormal uterine bleeding and heavy menstrual bleeding
- Ovarian cysts
- Overgrowth of the uterine lining (hyperplasia)
- Pelvic pain
- Hysterectomy alternatives

30055 Northwestern Highway  
Suite 260  
Farmington Hills, MI 48334
