

Cancer Centers of Excellence 2014 Annual Report

Southeast Michigan's Leading Provider of Health Care

St. John Providence (SJP) is Southeast Michigan's most comprehensive healthcare provider with five hospitals and more than 125 medical facilities. As the leading faith-based health care system in Michigan, SJP is part of Ascension Health, the largest not-for-profit health care system in the United States. SJP has over 18,000 associates with experts in over 50 specialties.

Dedicated to offering comprehensive cancer care, the St. John Providence Cancer Center of Excellence provides, compassionate patient focused cancer prevention, screening, detection, treatment and support. At SJP all of our Cancer Programs are accredited through the American College of Surgeons Commission on Cancer (CoC). The CoC is dedicated to improving survival and quality of life for cancer patients through standard-setting, prevention, research, education, and the monitoring of comprehensive quality care.

Both St. John Hospital and Medical Center and Providence Hospital underwent surveys for the American College of Surgeons CoC reaccreditation in October 2014. Both hospitals received 3-year reaccreditation with commendation, silver ranking, from the American College of Surgeons CoC. Commendations indicate exemplary performance. St. John Macomb-Oakland Hospital will undergo their reaccreditation survey in May 2015.

The SJP Community Health Assessment identified lung, breast, colorectal and prostate cancer as the disease sites most frequently diagnosed in SJP geographical area. The areas assessed were Metropolitan Detroit, Wayne, Macomb, Oakland, St. Clair, and Livingston Counties. The SEER data for SJP also demonstrated an increase in Head and Neck cancers diagnosed over the past three years. The community outreach plan was to increase cancer awareness and help the community identify risk factors.

According to the National Cancer Institute prevention and screening represent the twin pillars of our preemptive defenses against cancer. Cancer prevention includes efforts to detect and treat precancerous conditions or cancers at their earliest, most treatable stages, and the prevention of new, or second primary cancers in survivors.

Low Dose CT Lung Screening - 2014

In response to the National Lung Screening Trial (NLST), we developed a lung cancer screening program with the objective to increase diagnosis at an earlier stage providing a better opportunity for curative treatment.

	St. John Hospital and Medical Center	St. John Macomb-Oakland Hospital	Providence Hospital and Medical Center
Low Dose-CT Lung Screening	94	54	51
Required Follow up (based on NCCN guidelines)	94	54	51

Breast Screening - 2014

Total number of screening mammograms and biopsies performed.

	St. John Hospital & Medical Center	St. John Maccomb-Oakland Hospital	Providence Hospital and Medical Center
Screening Mammograms	18,917	9,304	34,935
Biopsies performed	479	207	1,116

Because We Care (BWC) Breast Screening - 2014

Screening mammograms for under and uninsured women at risk for breast cancer.

	St. John Hospital & Medical Center	St. John Maccomb-Oakland Hospital	Providence Hospital and Medical Center
<i>BWC</i> – Breast Imaging Services	39	8	43

Oral Cancer Screening - 2014

Oral head and Neck physical exams were performed and patients were provided with a take away bag of educational materials provided by the American Cancer Society that included facts about oral cancers and the risk factor associated with the disease.

Oral Cancer Screening	n/a	43	n/a
Required Follow up	n/a	16	n/a

Colorectal Cancer Awareness - 2014

A direct mailer was sent to 30,000 households to increase awareness and emphasize the importance of colorectal screenings. Newspaper ads were placed in the local newspapers. During the month of March, the Health System's telephone hold messages encouraged men and women to speak with their health care providers about colorectal screenings.
