

Steps for Infusion Therapy

Before you begin

- Allow your medication to warm to room temperature before using
- Prepare your work area and gather the needed supplies

Preparing the infusion

1 For your safety, please double-check that:

- Your name is correct on the label
- The medication and dose are correct
- Expiration date has not been passed
- The end cap and fill port cap are in place.

If any of the above are not correct or missing, **DO NOT** use the pump. Contact the pharmacy at **316.858.2100**.

2 Wash your hands thoroughly with soap and warm water. Dry thoroughly.

3 Follow instructions you've been given for cleaning and preparing your catheter/access device before connecting the pump.
